## 一次性使用磨钻头 Disposable Grinding Drill

### 一次性使用磨钻头产品介绍 Product description

- 1、专利产品：专利号CN201520846205.1  
Patented product: patent number CN201520846205.1
- 2、设置夹角3-10°的内倾角，使在关节突矢状位时骨钻不容易向腹侧打滑，扩椎孔稳定。  
Set the inclination angle of 3° to 10°, make it difficult for the bone drill to slip to the ventral side when in the sagittal position of the articular process, and enlarge the stability.
- 3、设置定位保护钝头，在扩孔时定位准确不偏移，同时能避免骨钻对神经根或硬膜的损伤。  
Set blunt positioning protection, accurate positioning without offset during reaming, at the same time, it can prevent the bone drill from damaging the nerve root or dura mater.
- 4、接头能兼容市场其它品牌手柄。  
The connector can be compatible with other brand handles in the market.
